

WareValley

Database Security and Management Software

Corporations, Large & Small call us when they want to protect their database and lower their costs. Unlike IBM (Guardium), Oracle, McAfee, Symantec; our database security Solution, Chakra reduces cost by 80% and performs 5 times faster than others. Our customers include Toyota, Sony, Canon, Prudential, LG and Samsung.

WareValley (<http://www.warevalley.com>) provides Database Security & Management solutions (**Database Activity Monitoring, Database Encryption, Database Vulnerability Assessment** and **Database Management & Monitoring**) with great quality to enterprises & governments. Over 2,300 companies and 150,000 users implemented WareValley's products to protect and to manage their databases efficiently.

Founded in 2001 by former executives from Oracle and Siebel, WareValley's management team consists of proven top professionals with extensive technology and management experience, and is the leading vendor of database security and management products in Asia. The Company's solutions support databases from **Oracle, IBM DB2, Microsoft SQL Server, Sybase (IQ & ASE), Mysql, and PostgreSQL**. WareValley's customers include both enterprise and service provider customers. WareValley, headquartered in Seoul, South Korea, employs professional database consultants and engineers with international distributors in Japan (42% Market Share, No.1), Taiwan, China, Germany, India, South Africa, Malaysia, Mexico, Australia, Brazil and US.
