10th Educatio International Exhibition on Education

Budapest, 22nd-23rd January 2010

The **EDUCATIO International Exhibition on Education** is the most significant and prestigious annual professional event in education in Hungary, organised every year since 2000. Hundreds of exhibitors are represented, including dozens of foreign educational institutions and companies. **The sphere of our foreign exhibitors is growing wider each year**; higher education institutions and schools both inside and outside the European Union also take part in the exhibition.

Many foreign students study in Hungary because of the traditionally high standards of Hungarian higher education, however, the number of Hungarian students studying abroad is also growing year by year. **The mobility of Hungarian students is increasing gradually** and this tendency is supported by the increasing number of foreign exhibitors represented at the Educatio Exhibition. Studies abroad also offer an advantage in finding a job later on, which has been recognised by the majority of Hungarian students.

We would like to bring even more foreign exhibitors before the public at the 10th Jubilee Educatio Exhibition. In addition to the exhibition pavilions, exhibiting companies and institutions can communicate with visitors through lectures, presentations and the exhibition catalogue. The number of visitors is expected to be close to 40,000, the majority of whom are young adults between the age of 17 and 25 who are interested in higher education opportunities.

Active participation at the exhibition is recommended in order to attract even more Hungarian students or to broaden business relations with the participants and decision-makers in the Hungarian education system. **Applications can be made at www.educatio.hu/educatio2010 until 30th November 2009.**

If you have any questions, please contact Katalin Kovács at kovacs.katalin@educatio.hu.
